

At St. Aloysius Institute of Technology we believe that hostel is students' second home and we provide the best for our students and groom them for the upcoming challenges of the outside world.

We have separate hostels for the boys and the girls in the College Campus with well furnished spacious rooms and dormitories with attached bathrooms. It also has the facilities for Indoor and outdoor games, reading room, safe drinking water, separate study hall and hot water facility. We have clean and healthy mess that provides healthy food for the students living in the hostel.

The well disciplined atmosphere, residential warden, individual care for the students, personality development sessions, etc help the students to have a holistic development. The unique feature of the hostel is that it has students from all over India having distinct cultural heritage which helps students to have interaction with each other and prepare them to work in a multi-cultural environment.
